

## Lab 8

Isa Dzhumabaev

### Bipartite

Original:

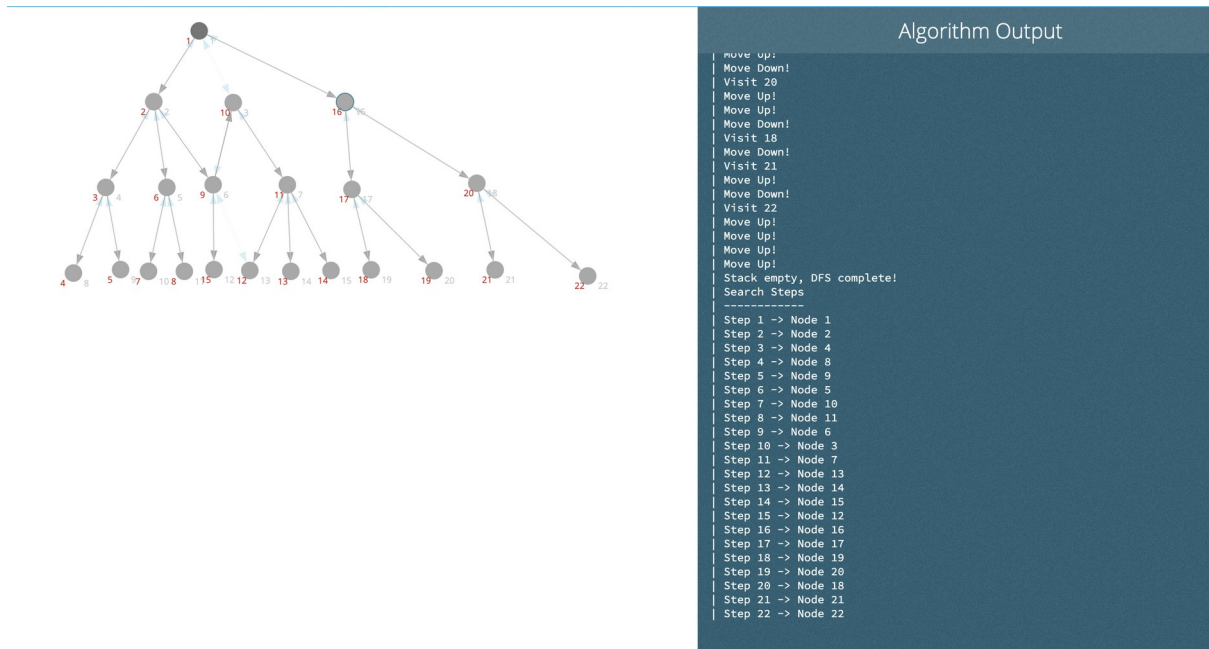

---

Modified:

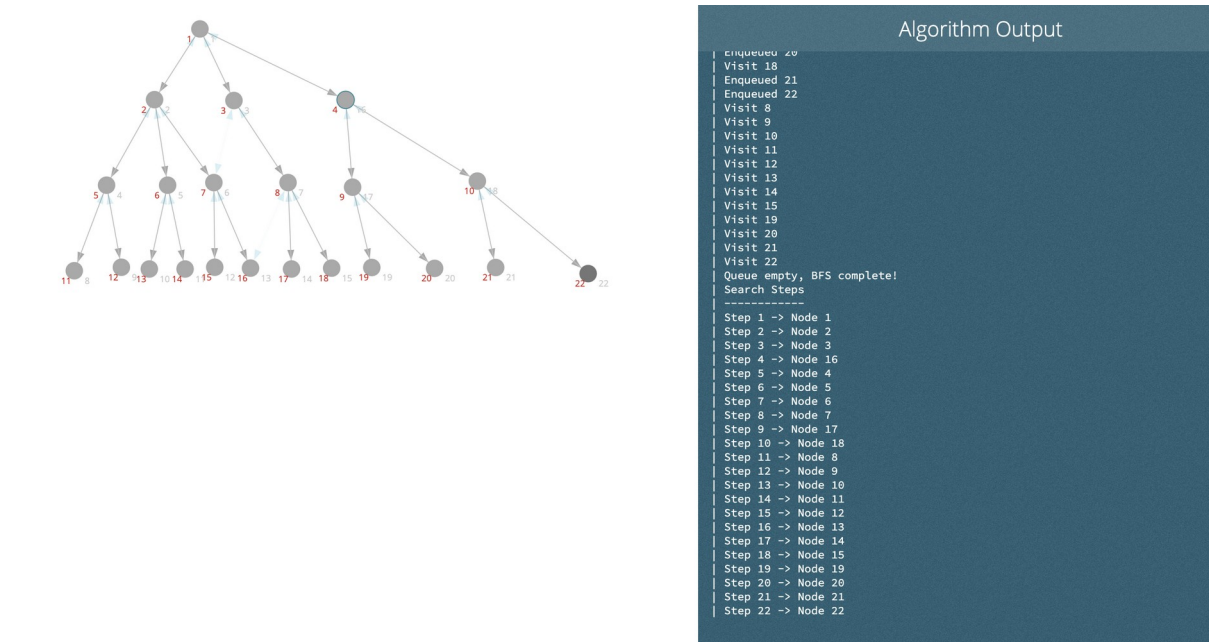

DFS Solution:

A few changes. DFS explores everything as in original graph, but in the end it also goes to third child of root and explores it.

BFS Solution:

The one thing that has changed is third child of root and that is why BFS first explores 3 children of root, in original problem it would go to next depth after second child.

## Directed Graph

Original:

Modified:

DFS Solution

```

Alg
| move Down!
| Visit 2
| Move Down!
| Visit 4
| Move Down!
| Visit 6
| Move Down!
| Visit 9
| Move Up!
| Move Up!
| Move Down!
| Visit 8
| Move Up!
| Move Up!
| Move Down!
| Visit 7
| Move Up!
| Move Up!
| Move Down!
| Visit 3
| Move Down!
| Visit 5
| Move Down!
| Visit 10
| Move Up!
| Move Up!
| Move Up!
| Stack empty, DFS complete!
| Search Steps
| -----
| Step 1 -> Node 1
| Step 2 -> Node 2
| Step 3 -> Node 4
| Step 4 -> Node 6
| Step 5 -> Node 9
| Step 6 -> Node 8
| Step 7 -> Node 7
| Step 8 -> Node 3
| Step 9 -> Node 5
| Step 10 -> Node 10
  
```

Changes appeared after step 4. In original graph it goes back to node 2 and but here it continues to node 5. After that all path is different.

BFS Solution:

```

Alg
| Start at 1
| Enqueued 1
| Visit 1
| Enqueued 2
| Enqueued 3
| Enqueued 7
| Visit 2
| Enqueued 4
| Enqueued 7
| Visit 3
| Enqueued 5
| Enqueued 7
| Visit 7
| Enqueued 6
| Visit 4
| Enqueued 6
| Enqueued 8
| Visit 5
| Enqueued 6
| Enqueued 10
| Visit 6
| Enqueued 9
| Visit 8
| Enqueued 9
| Visit 10
| Enqueued 9
| Visit 9
| Queue empty, BFS complete!
| Search Steps
| -----
| Step 1 -> Node 1
| Step 2 -> Node 2
| Step 3 -> Node 3
| Step 4 -> Node 7
| Step 5 -> Node 4
| Step 6 -> Node 5
| Step 7 -> Node 6
| Step 8 -> Node 8
| Step 9 -> Node 10
| Step 10 -> Node 9

```

Path is same before stp 7, changes after step 7 as there are new nodes.

## Directed Cycle

Original:

## DFS Solution:

```
move Up!  
Move Down!  
Visit 8  
Move Down!  
Visit 9  
Move Down!  
Visit 10  
Move Down!  
Visit 14  
Move Down!  
Visit 11  
Move Down!  
Visit 12  
Move Down!  
Visit 13  
Move Up!  
Move Up!  
Move Up!  
Move Up!  
Move Up!  
Move Up!  
Move Up!  
Move Up!  
Stack empty, DFS complete!  
Search Steps  
-----  
Step 1 -> Node 1  
Step 2 -> Node 2  
Step 3 -> Node 3  
Step 4 -> Node 4  
Step 5 -> Node 5  
Step 6 -> Node 6  
Step 7 -> Node 7  
Step 8 -> Node 8  
Step 9 -> Node 9  
Step 10 -> Node 10  
Step 11 -> Node 14  
Step 12 -> Node 11  
Step 13 -> Node 12  
Step 14 -> Node 13
```

No changes before step 7. After step 7 a new path is just added to original.

## BFS Solution:

Some significant changes. Right after step 3 BFS goes to node 8 insted of going to node 3 as it did in original graph. All the path after 4 is different from original solution.
